Machines, Weight
Equipment and more.**

GYM EQUIPMENT MAINTENANCE & REPAIRS

Fitness Equipment Servicing

Dave at Ro-Fix has been maintaining and servicing fitness equipment both commercial and domestic for over four years now. Previously working for one of the UK's leading fitness repair companies before setting up on his own. We aim to give high quality service and excellent value for money.

A regular service on your fitness equipment will ensure the equipment is running at its best and help identify any issues, it will also help prolong and extend the life of the machine:

If you have a problem with your fitness equipment give us a description of the fault and we can diagnose what is causing the problem and arrange the repair and the carry out a service.

A service will include where applicable the following:

- Clean inside of mechanical areas
- Lubrication of moving parts
- Adjustment of parts to ensure smooth running
- Check of all functions to ensure working correctly
- Motor current test on treadmills, to identify resistance issues in machine

Please note a service will not correct a fault or broken part, please provide any fault details in the enquiry form at the bottom of the Ro-Fix web page.
